NEW, RARE AND SELECT PLANTS, FOR 1871.

NEW GOLDEN BRONZE GERANIUMS.

This class is destined to become the most popular of the Fancy Geraniums; the foliage is not quite so striking as the tricolors when in perfection, but when their general qualities, either as bedding plants or pot plants, are taken into consideration they will be found fully as effective and far more satisfactory. There is no difficulty in growing them, as they are as vigorous as the green leaved sorts, standing the sun well and making a beautiful bed where the tricolors dwindle away. With the improvements in the new sorts, the rich contrast of their profusion of gold and bronze foliage render them magnificent additions to any collection. The following are some of the recent additions:

BLACK KNIGHT, thick leathery leaves, with the broadest and deepest zone of any; fine for bedding. $1.

CHOICE GREENHOUSE FERNS.

A fine collection of the best ferns for the greenhouse, or for fern cases and hanging baskets.

Selections of handsome varieties made by Hovey & Co. at $2, $3, and $5 per dozen.

TRITOMAS.

Splendid half-hardy, evergreen, herbaceous plants, forming large, robust, stemless leaf crowns, from the centre of which their tall flower-stems, three to five feet in height, are produced in summer and autumn, with large, dense-flowered terminal racemes of rich, pendent, orange-red, and scarlet tubulous flowers; each raceme a foot or more in length.

They are admirably adapted for bedding out; and the numerous terminal flame-colored blossoms form a stately distant or mediate effect. They thrive in any rich light garden soil. On approach of winter, they should be taken up and placed in the greenhouse or cellar for replanting out in spring.

**ACHIMENES.**

Our collection comprises upwards of forty handsome sorts, among which we name the following:

$3 per dozen.

NÆGELIAS.

The Nægelias are superb plants, similar to the Gesnerias, and have the same magnificent large green velvety foliage, often marbled and spotted with crimson. Their habit is erect, and the numerous flower stems are terminated with pyramidal spikes of large tubular flowers, yellow or cream colored, and splendidly spotted or marbled with scarlet, red or crimson. As summer ornaments of the greenhouse there are few plants that can equal them. The following are from the great collection of Van Houtte, and are seedlings raised by him:

**Chromatella**, flowers very open, yellow, lightly shaded toward the interior; foliage similar to *N. zebra*.
**Cinnabarina Rosea**, tube clear vermillion, velvety, almost transparent, marbled with deep scarlet, and speckled with gold.
**Alba Lutescens Grandiflora**, flowers very large, cream colored, foliage like Cinnabarina Rosea.
**Clithonti**, very large, yellow and vermillion, mottled with crimson.
**Mad. Paul Boutez**, beautiful pale pink, speckled with amaranth and yellow, throat spotted with scarlet.
**Geroldtiana**, flowers red on the outside, yellow inside, mottled.
**Velutina**, beautiful foliage.
**Leopoldi**.
**Ignea**.

Price, 50 cents each; $4.50 per dozen.
HIGHLY attractive and ornamental from the rich coloring of the large leaves, and well adapted for conservatory decoration in summer and autumn. Some of the varieties are also fine for planting out in half shady beds in summer where they flourish finely. Begonia Rex is admirable for bedding out, (see engraving.)

The following are a few or the best kinds, of good habit and free growth, with well defined and distinct foliage:

Duchess de Brabant. | Leopoldi.
Grandis. | Picta.
Fred. Siesmayer. | Picturata.
Mad. Crouse. | Queen Victoria.
Marshallii. | Rollinsoni.
Mad. Wagner. | Rex.
Miranda. | Recinifolia maculata.

Price, 50 cents to $2 each.

Seedlings of extra fine named English Prize flowers, $2 per dozen.

Seedlings of extra fine French Fancy varieties, $1.50 per dozen.

AGAVES AND YUCCAS.

The Agaves and Yuccas are a speciality of culture, and our collection is unsurpassed in this country. Many of the kinds are yet so rare and scarce that we cannot offer them for sale until another year, but we invite amateurs to examine them. We are constantly adding all the finest species. No plants are more decorative or effective than the Agaves and Yuccas, and for the conservatory in winter or the lawn and garden in summer, they are highly ornamental and picturesque as well as tropical in aspect.

A magnificent collection of these most beautiful of all the ornamental foliaged plants, for the decoration of the Conservatory or Greenhouse in Summer, with large sized leaves, spotted, blotched, marbled, speckled or flecked with white, or crimson, on a green ground. The following embrace some of the newest and finest varieties:

The ease with which it may be flowered, if good bulbs are selected, gives it additional value as a garden plant. If the bulbs are started early, and planted out in the open ground, they will flower abundantly all the latter part of summer.

Fine bulbs, started in four inch pots, $3 per dozen.

ROSES.

Our plants are upon their own roots, and are mostly grown in pots for the better convenience of transporting at any season, and the certainty of their growth. It is well known that roses transplanted from the open ground often fail to grow, and of those that succeed scarcely any of them bloom the first season. Those from pots take root at once and flower abundantly. Purchasers leaving the selection to us, will get a fine assortment of varieties and generally better plants.

To obtain a fine display of roses the soil should be well enriched with old manure, covering the ground in Autumn four inches deep. If the season is dry give them plenty of water and occasionally liquid manure.

This is the king of lilies, and, as Dr. Lindley truly remarked, "If ever a flower merited the title of "glorious" it is this, whether we regard its size, sweetness or exquisite arrangement of color." The flower is from eight to twelve inches across, composed of six delicate white ivory petals, each being thickly studded with rich chocolate crimson spots, and having a bright golden band through the centre of each petal. As the bulbs acquire age and strength, the flowers obtain their maximum size and number. Upwards of twelve flowers have been produced on a single stem. It is perfectly hardy in dry soils, and is also admirably adapted for pot-culture.

Strong Flowering Bulbs, $1 each, $8 per doz.; Second Size, 75 cts. each, $6 per doz.; Third Size, 50 cts. each, $4 per doz.; extra size, $2 each. Price per 100, on application.
